[Download Convert Cda To Mp3 Software](#)

The screenshot shows the 'Audio Transcoder' application window. It features a menu bar (File, Edit, Action, Options, Help) and two tabs: 'Audio CD Ripper' and 'Audio Converter'. The 'Audio CD Ripper' tab is active, showing a device selection dropdown (E: RSVI JK92BOL2 1.03), speed (48), and a 'Load/Eject' button. Below this are fields for Artist (Deep Forest), Genre (misc), Album (Essence Of The Forest), Composer, Year (2004), and a 'select' button. A 'freeDB' logo is also visible. The main area is a table of tracks with checkboxes for selection. A callout bubble points to the checkboxes with the text 'Select the tracks to be ripped.' The table lists 21 tracks by Deep Forest. To the right is a 'Metadata' section with a 'Load...' button, a 'Clear' button, and fields for Album (Essence Of The Forest), Genre (misc), Year (2004), and a 'Comment' field. At the bottom, there are playback controls (21 - 78:49), 'Output' settings (Output mode: Multiple files, Output filenames, Output folder), and 'Output format' settings (.mp3 (MPEG-1 Audio Layer 3), Near CD Quality (128 kbit/s)). A 'Settings' button and a 'Rip CD' button (with a musical note icon) are also present. A callout bubble points to the 'Rip CD' button with the text 'Click Rip CD.' Another callout bubble points to the 'Output mode' dropdown with the text 'Customize output settings.' A status bar at the bottom left says '15 file(s) have been imported successfully.'
